Problem Statement

1. Traditional methods for training new Planning Council members were costly, date/time/venue bound and inconsistently attended
2. Needed to develop a New Member Training that was low-cost, accessible 24/7 and facilitated participation by all

Vision

Development of a web-based, audio-assisted system where new Planning Council members could access trainings at their own pace

- Provides basic content consistently over time
- Utilizes visual analytics to monitor training progress
- Certifies completion of trainings
- Provides a better training opportunity by meeting members "where they are"
